US30 PERFORMANCE ANALYSIS: SEPTEMBER & OCTOBER 2026

Data-Backed Performance Breakdown of the BMM US30 Starter Automation

Published By: BMM Automation Research & Trading Desk **Date: November 2026**

2-MONTH NET RESULT (0.01 LOT)

+$200

+200% on a $100 account | +2,000 points

77 Trades	44.2% Win rate
1:2 Risk : Reward	27 / 14 Green / Red days

SEPTEMBER

Strong trend month

+$168 **+168%**

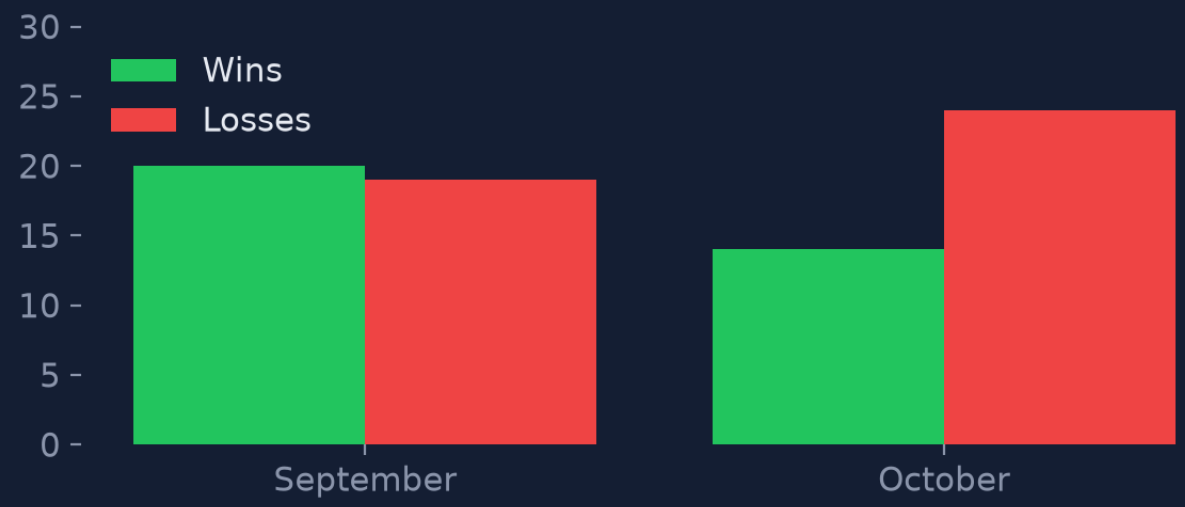

Trades	39
Wins / Losses	20 / 19
Win rate	51.3%
Net points	+1,680
Green / Red days	15 / 6

OCTOBER

Choppy, consolidating month

+$32 **+32%**

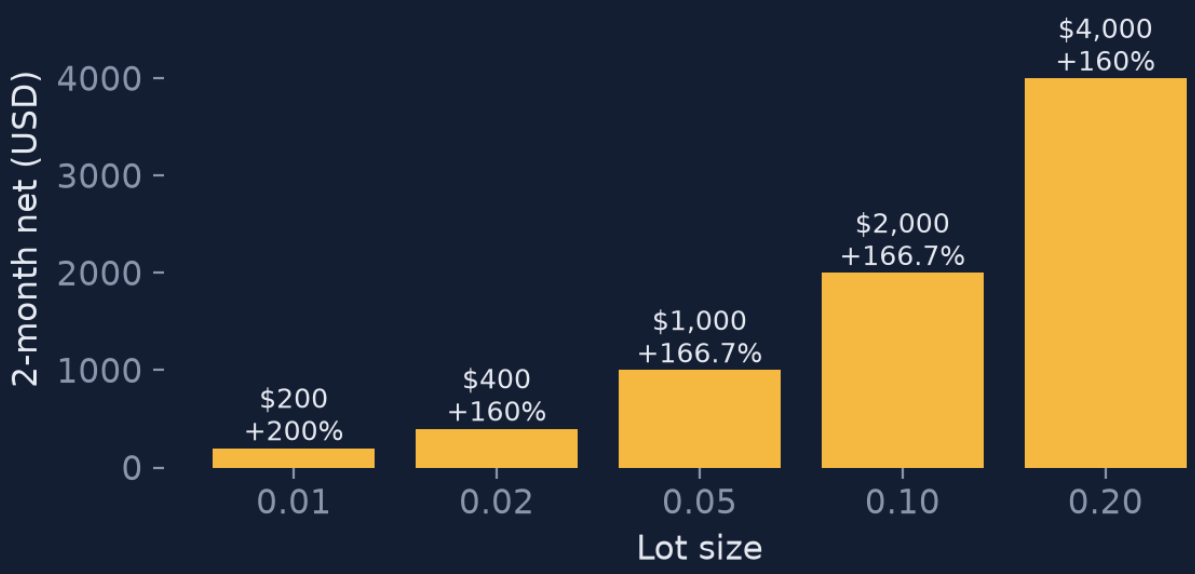

Trades	38
Wins / Losses	14 / 24
Win rate	36.8%
Net points	+320
Green / Red days	12 / 8

Why it was positive with under 50% wins: every win pays 160 points, every loss costs 80.

SCALING YOUR RESULTS

Bigger lot, bigger result - and bigger risk

Lot	Risk/trade	Target/trade	Sep	Oct	2-month	Account	Gain %
0.01	$8	$16	+$168	+$32	**+$200**	$100	**+200%**
0.02	$16	$32	+$336	+$64	**+$400**	$250	**+160%**
0.05	$40	$80	+$840	+$160	**+$1,000**	$600	**+167%**
0.10	$80	$160	+$1,680	+$320	**+$2,000**	$1,200	**+167%**
0.20	$160	$320	+$3,360	+$640	**+$4,000**	$2,500	**+160%**

Gain % = 2-month net profit divided by the suggested starting balance for that lot size. Example: $200 profit on a $100 account = +200%. Results are before spreads, slippage and fees.

GOLDEN RULE

Stay on 0.01 lot until your account is above $250. At 0.01 a loss costs $8 - about 8% of a $100 account. Two losses in one day = $16.

THE STRATEGY

US30 Starter - the exact settings

Symbol	US30 (Dow Jones / Wall Street 30)
Signals	BMM Killshot US30 alerts, BUY and SELL, no extra filters
Trading window	09:00 - 13:00 New York time (5 - 9 PM Nairobi now; 4 - 8 PM after 14 Mar 2027)
Stop loss	80 points ($8 per 0.01 lot on AvaTrade)
Take profit	160 points ($16 per 0.01 lot) - 1:2 risk to reward
Daily limit	Maximum 2 trades per day
TenTrade	Minimum 0.1 lot; stops 8000 / 16000 points

HOW TO SWITCH IT ON

1. Connect your MT5 account (AvaTrade or TenTrade) in Trading Account.
2. Open Autotrader Setup and switch US30 Starter ON - it opts you into managed trades and sets the pair automatically.
3. Choose your lot size (0.01 for accounts under $250).
4. Leave it switched on - BMM executes signals in the cloud; your phone can be off.

IMPORTANT DISCLAIMERS

- SIMULATED RESULTS: These figures are a historical replay of BMM Killshot US30 signals against recorded prices using the rules above. They are NOT results from real member accounts.
- PAST PERFORMANCE DOES NOT GUARANTEE FUTURE RESULTS. October showed much smaller gains than September; future months may lose money.
- Live results will differ because of spreads, slippage, commissions, swaps, broker requotes, internet or broker outages and missed signals.
- Trading CFDs and forex on margin is high risk and can lose you more than expected. Only trade money you can afford to lose.
- Gain percentages assume the stated starting balance and no withdrawals; they are not a promised return.
- This document is education and information only, not financial or investment advice. BMMFX / AgloBmm Dynamics Solutions Limited.
